

Statement of Interest

Transportation Professional Certification Board — Discipline Director

Alejandro (Alex) Anaya, PE, PTOE

I am writing to express my interest in serving as a Discipline Director on the Transportation Professional Certification Board (TPCB). As a Professional Traffic Operations Engineer with 27 years in the transportation profession, I would welcome the opportunity to give back to the credentialing program that has helped define the standard of practice throughout my career.

Why I would like to serve

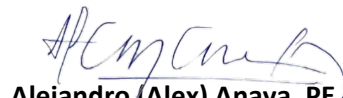

The PTOE certification has been a meaningful marker of competence and commitment in my own work, and I believe strongly in the role that credible, well-governed certification plays in advancing our profession and protecting the public. I would like to help safeguard the rigor, relevance, and fairness of the certification process, and to ensure that it continues to reflect the evolving practice of transportation engineering—including emerging priorities in safety, multimodal mobility, and operations. Having built my career across academia, public agencies, large consulting firms, and my own practice, I am motivated to serve the broad community of certificants rather than any single interest.

What I would bring to the office

- **Technical depth.** My practice centers on traffic operations, safety, signal and roundabout design, corridor and PD&E studies, microsimulation, and travel-demand modeling—the core competencies the certification is meant to validate.
- **Leadership and governance experience.** As President of ESRP Corporation since 2010, I have led an engineering firm's technical, financial, and administrative operations, and I understand the responsibilities of board-level stewardship and sound, impartial decision-making.
- **Breadth of perspective.** My career has spanned roles from research assistant and MPO analyst to senior project manager and firm owner. My international background—education and practice in Colombia and the United States, with fluency in English and Spanish—helps me represent a diverse and growing certificant population.
- **Commitment to the standard.** I hold PE licensure in Florida and Kentucky in addition to the PTOE, and I am an active member of ITE and ASHE. I take seriously the ethical and professional obligations that certification represents.

I am fully prepared to commit the time the role requires, including the Board's annual in-person meeting and periodic conference calls, and to contribute constructively throughout the three-year term. I would be honored to be considered by the Nominations Committee.

Respectfully,

Alejandro (Alex) Anaya, PE, PTOE

President / Senior Transportation Engineer, ESRP Corporation
