Re: Expressions of Interest for Discipline Director Positions,

Dear Members of the Transportation Professional Certification Board (TPCB):

I am writing to express my interest in serving as a Discipline Director for the TPCB. As a transportation engineer with more than 36 years of experience in transportation engineering, operations, research, and leadership, I believe I can contribute meaningful technical insight, sound judgment, and a deep commitment to professional excellence in support of TPCB's mission. I am particularly interested in this role because TPCB plays an important part in advancing the transportation profession by certifying expertise in traffic operations, transportation planning, and safety, while helping protect the public by promoting high standards of knowledge and practice. Throughout my career, I have valued the role that professional credentials play in strengthening technical competence, encouraging continued professional growth, and reinforcing public confidence in the transportation profession.

As a licensed Professional Engineer in Texas, a Professional Traffic Operations Engineer, and a Project Management Professional, I have spent my career working on transportation systems management and operations, freeway operations, active traffic management, managed lanes, freight traveler information, and regional operations. Additionally, I have served in senior leadership roles at the Texas A&M Transportation Institute and now lead C-DEX Advisors, where I continue to support complex transportation initiatives and strategic problem-solving. Moreover, throughout my career I have served our profession in various leadership roles in ITE and the Transportation Research Board. There I have gained experience working with professionals across disciplines, supporting strategic initiatives, and helping organizations strengthen their impact and credibility. I would be honored to bring that same spirit of service, professionalism, and stewardship to the TPCB Board and bring a strong respect for fairness, rigor, and the value of credentials that recognize true professional capability—principles that are central to TPCB's role as a certification body.

I would be honored to serve on the TPCB Board and help ensure that its certifications continue to reflect technical excellence, professional integrity, and the evolving needs of the transportation field.

Sincerely,

Beverly Thompson Kuhn, Ph.D., P.E., PTOE, PMP
