- M.E., Civil Engineering, Texas A&M University, 1990
- B.S., Civil Engineering, Texas A&M University, 1989

Background and Qualifications

Dr. Beverly Kuhn has more than 36 years of experience associated with transportation engineering and operations research, deployments, and evaluation. She is a registered professional engineer in the State of Texas, a Professional Traffic Operations Engineer, and a certified Project Management Professional. She is a national leader in the field of transportation systems management and operations (TSMO). Her extensive experience includes developing capability assessment frameworks for organizations and business functions within transportation along with the development of online assessment tools and related outreach for their use by agency personnel. She also has experience managing large complex projects utilizing the PMI approach and coordinating multiple team members across a variety of organizations and geographic locations. For over 25 years, Dr. Kuhn has served as project manager and principal investigator on numerous projects for NCHRP, FHWA, state agencies, local agencies, and private sector clients in support of broad range of topics related to advanced transportation operations. As part of these projects, she led and conducted complex research initiatives for specific topic areas – including freeway operations, transportation systems management and operations, active transportation and demand management, active traffic management, capability maturity frameworks, managed lanes, statewide freight traveler information, and regional operations. As part of this work, she developed comprehensive technical reports; prepared detailed guidance documents; developed on-line screening tools related to business process improvements; developed implementation materials; and organized, held, and documented workshops for professionals on various operations topics.

Licenses & Certifications

- Professional Engineer, State of Texas, License Number 80308
- Professional Traffic Operations Engineer, Certificate Number 5255
- Project Management Professional, Number 1980144
